Brgy. Bs Aquino, Norala South Cotabato, Philippines

## EDUCATION

---

**Sultan Kudarat State University – Isulan Campus**  
*Bs in Information Technology*

**Isulan, Sultan Kudarat**  
July , 2027

## EXPERIENCE

---

### Web Developer

July 2026 - Present

*LUMNAIRE | Laravel, REST API, React, Typescript, Tailwindcss, Mysql*

- Developed scalable web applications using **Laravel, React, Tailwind CSS, and MySQL**, supporting **1,000+ users** with responsive and intuitive interfaces.
- Designed secure backend architectures by implementing **RESTful APIs, RBAC, JWT authentication, and database optimization**, improving system security and reliability.
- Increased application performance by optimizing database queries, API responses, and frontend assets, resulting in faster page load times and a smoother user experience.
- Collaborated in an Agile development environment to design, test, and deploy production-ready software while maintaining clean, scalable, and well-documented code.

### Freelance – Software Developer

August 2025 - Present

*TECHSTACK | Laravel, Node.js, Django, React, Typescript, Tailwindcss, Mysql, PostgreSQL*

- Developed custom web applications for academic and personal projects.
- Designed responsive user interfaces.
- Integrated backend **APIs** and databases.
- Assisted in debugging and maintaining applications.

## PROJECTS

---

### Full-stack Development

*LBMS | Laravel, React, Typescript, Tailwindcss, Redis, REST API, MySQL*

- Developed a full-stack **Library Book Management System** using **Laravel, React, Tailwind CSS, and MySQL**, enabling efficient book catalog management, borrower tracking, and administrative workflows through a responsive web interface.
- Implemented secure authentication, QR code-based borrowing and returning, email notifications, and role-based access control (RBAC), improving system security, scalability, and overall user experience.

### Flutter Development

*AUTOMATED PET FEEDER | Flutter, C++, Firebase*

- Engineered a cross-platform IoT pet feeding system using **Flutter, ESP32, and Firebase**, allowing users to automate feeding schedules and remotely control feeding operations through a mobile application.
- Designed a real-time monitoring system by integrating an **ultrasonic sensor** with **Firebase Realtime Database**, enabling instant food level updates and reliable communication between the mobile application and IoT device.

## SKILLS AND INTERESTS

---

**Language:** PHP | JavaScript | TypeScript | Python | Dart | C++ | SQL

**Frameworks & Libraries:** Laravel | Node.js | Django | React | Expo | Flutter | Tailwind CSS | Bootstrap | Inertia.js

**Cloud & DevOps:** Firebase | Supabase | Docker

**Tools:** Git | GitHub | MySQL | PostgreSQL | SQLite | Linux (Ubuntu) | VS Code | Figma | Arduino IDE
